

LEAGUE OF NATIONS

CONVENTION FOR LIMITING THE MANUFACTURE
AND REGULATING THE DISTRIBUTION OF NARCOTIC
DRUGS OF JULY 13TH, 1931

ESTIMATED
WORLD REQUIREMENTS OF
DANGEROUS DRUGS IN 1941

Statement issued by the Supervisory
Body under Article 5

CONFIDENTIAL

O.S.B./STATEMENT 1941

Geneva, December 1st, 1940.

LEAGUE OF NATIONS

**CONVENTION FOR LIMITING THE MANUFACTURE
AND REGULATING THE DISTRIBUTION OF NARCOTIC
DRUGS OF JULY 13TH, 1931**

CITY LIBRARY

**ESTIMATED WORLD REQUIREMENTS OF
DANGEROUS DRUGS IN 1941**

**Statement issued by the Supervisory
Body under Article 5**

The Supervisory Body is constituted under Article 5 of the Convention as follows:

Appointed by the Advisory Committee of the League of Nations on the Traffic in Opium and Other Dangerous Drugs: Sir Malcolm DELEVINGNE, K.C.B., K.C.V.O. (President).

Appointed by the Permanent Central Opium Board: Mr. Herbert L. MAY.

Appointed by the Health Committee of the League of Nations: Professor M. TIFFENEAU.

Appointed by the Office international d'Hygiène publique: Dr. H. CARRIÈRE.

ESTIMATED WORLD REQUIREMENTS OF DANGEROUS DRUGS IN 1941

STATEMENT ISSUED BY THE SUPERVISORY BODY UNDER ARTICLE 5

The Supervisory Body, which was constituted by the International Convention of 1931 for the purpose of examining each year the estimates submitted by Governments of their requirements of dangerous drugs and preparing a statement of the total world requirements, presents, in the tables annexed, a statement of the estimated requirements of each country or territory during 1941.

In the introduction to the statement for 1940 (document O.S.B./Statement 1940) the Supervisory Body noted that the necessity for a national and international control of drugs is now universally recognised, as is shown by the fact that, with few exceptions, all nations are parties to the Limitation Convention. At the same time, it emphasised that the importance of that control is not diminished in war-time; on the contrary, as the experience of the last war showed, it is accentuated by the psychological and other conditions created by a state of war which affects profoundly not merely the nations engaged in the conflict, but many, if not most, other countries.

In this connection, the Supervisory Body, in conjunction with the Permanent Central Opium Board, addressed the following letter, in May 1940, to the Chairman of the Advisory Committee on Traffic in Opium and other Dangerous Drugs, which held its twenty-fifth session from May 13th to 17th, 1940.

" Geneva, May 10th, 1940.

" Sir,

" At meetings held between May 6th and 10th, 1940, the Permanent Central Opium Board (fortieth session) and the Supervisory Body (seventeenth session) reviewed the working, since the outbreak of war in Europe, of the international control for which they are responsible.

" The Supervisory Body recorded that eight months of war have not substantially affected the receipt of supplementary estimates, for in that period the Supervisory Body has examined more than sixty supplementary estimates involving a total of 10 tons of the more important drugs. This shows that Governments which have become familiar with the system of estimates and with the purpose which they serve are also anxious to make certain of obtaining the amount of drugs they require are fulfilling their obligations under the 1931 Convention.

" The Permanent Central Opium Board has taken note that almost all Governments continue to send, as in the past, statistical and other information as required under the 1925 and 1931 Conventions. Since the war started, information has been received from fifty-six countries and in respect of nearly 100 colonies and dependencies. Moreover, the Board has expressed its satisfaction at the communications received from a number of Governments in reply to a circular letter issued by the Board in October 1939 asking Governments to continue complying with their obligations under the Opium Conventions and sending to the Board the statistical and other information without which the international control cannot be effective. By declaring that they will continue to send all the information prescribed by the Conventions as completely and regularly as possible, these Governments have clearly indicated their desire that the international control should be maintained in time of war.

" These results afford a solid basis for the belief that Governments generally appreciate the importance of maintaining the international and national controls which alone can prevent a recurrence of the increase in drug addiction and smuggling which occurred during and after the war of 1914-1918.

"This subject will no doubt be engaging the close attention of the Advisory Committee on Traffic in Opium and other Dangerous Drugs during its session next week. The Permanent Central Opium Board and the Supervisory Body desire to bring the above circumstances to the knowledge of the Advisory Committee, which will doubtless wish to exercise its influence with Governments so that they may ensure, in time of war, the working of the national and international control established by the Opium Conventions.

(Signed) Atul CHATTERJEE,

*President of the Permanent
Central Opium Board.*

(Signed) Malcolm DELEVINGNE,

President of the Supervisory Body."

At its twenty-fifth session, the Advisory Committee directed its attention more particularly to the question of the importance of maintaining national and international supervision over narcotic drugs and the influence of the state of war upon that supervision. In this connection, it adopted a resolution which was communicated to Governments in the letter from the Acting Secretary-General of the League of Nations (C.L.83.1940.XI), dated October 28th, 1940. In its resolution, the Committee, after recalling the fact that the last war led to a very marked recrudescence of drug addiction and an immense extension of the illicit traffic, expressed the opinion that it is essential that Governments and international organisations should take all possible steps to prevent an extension of drug addiction and a reversion to the conditions which existed during and after the last war (1914-1918); it is therefore essential that the international organisations should continue to carry on their duties so far as possible and that, accordingly, Governments should, for their part, enable these organisations to fulfil their obligations, more particularly by supplying them, *inter alia*, with estimates of their requirements in drugs.

For its part, the Supervisory Body has done everything within its power with a view to maintaining intact the estimates system, which constitutes the basis of all international supervision. It is glad to be able to record that Governments are continuing, in large measure, to extend to it that collaboration which is indispensable.

The annual estimates for 1941 should be received each year by August 1st; they were, however, greatly delayed, chiefly owing to difficulties of postal communications. On August 1st, 1940, estimates in respect of 1941 had been received from only twelve countries and two territories. On two occasions, in pursuance of the instructions given by the Supervisory Body, the Secretariat reminded Governments of the necessity for communicating their estimates. The way in which Governments responded to these reminders was, in general, satisfactory. At the time when the statement was sent to the printers, indeed, annual estimates for 1941 had been received in respect of fifty-two countries and forty-four territories. The Supervisory Body had, therefore, itself, in accordance with Article 2, paragraph 2, of the Convention, to frame estimates for eighteen countries and sixty-two territories.

Whilst, in ordinary times, the framing of estimates by the Supervisory Body is no easy task, it must be abundantly clear that, in the present world situation, and having regard to the way in which the war is affecting requirements of narcotic drugs and to the difficulties of obtaining supplies, that task has become very difficult. For the purpose of framing estimates for countries and territories which did not furnish their own estimates, the Supervisory Body took as its starting-point the estimates agreed upon for the previous year, together with the information available concerning actual consumption during recent years.

In framing the estimates, the Supervisory Body confined itself, in accordance with the principle adopted in the past, to estimates for consumption (heading I of Statistical Form B (L) and, where appropriate, conversion (heading II). In the case of estimates for reserve stocks (headings III, IV and V), the Governments are requested to be good enough to complete the estimates drawn up by indicating the quantities which they may require for this purpose.

The Supervisory Body would remind Governments which have not furnished their own estimates that, if those which it has itself framed do not correspond to the requirements of the country concerned for 1941, it will always be possible for them to transmit supplementary estimates.

Reviewing the situation during the year 1940, the Supervisory Body is in a position to state that, in a general way, Governments have realised that it is in their interest to maintain the estimates system and it is glad to note that Governments have extended to it the collaboration which has enabled it to discharge its duties in a satisfactory manner. They have thus contributed towards maintaining the effectiveness of the estimates system.

The Supervisory Body firmly hopes that Governments will continue in the future to carry out their task as they have done in the past, by furnishing their annual and supplementary estimates, and to ensure national and international supervision over narcotic drugs.

* * *

As was the case in 1940, the present Statement shows that many countries have taken measures to safeguard themselves against interruptions of trade, etc., due to the war, and considerable stocks have been or are in process of being created. This may lead to some increase.

of manufacture and may in itself constitute a danger unless the full system of control is maintained.

The following table summarises for each drug covered by the Convention the estimated world requirements for 1941:

Table I.

TOTAL ESTIMATED WORLD REQUIREMENTS OF EACH DRUG IN THE YEAR 1941 FOR MEDICAL AND SCIENTIFIC PURPOSES

1 Drugs (in anhydrous alkaloid)	2	3	4	5
	Amount required for use as such (consump- tion)	Amount required for conversion	Additions or deductions required to bring stocks to desired level	Grand Total (cols 2+3+4)
	Kg.	Kg.	Kg.	Kg.
1. Morphine	9 582	34 301	27	43 910
2. Diacetylmorphine	812	.	2	814
3. Cocaine	4 618	.	23	4 641
4. Dihydrohydroxycodineone	328	.	2	330
5. Dihydrocodeinone	195	.	.	195
6. Dihydromorphinone	117	.	.	117
7. Acetyldihydrocodeinone	78	.	.	78
8. Morphine-N-Oxide (Genomorphine)	6	.	.	6
9. Thebaine	17	652	.	669
10. Methyilmorphine (Codeine)	29 270	610	148	30 028
11. Ethylmorphine (Dionine)	2 867	.	24	2 891

Note. — In the totals, grammes are omitted, and the figures approximated to the nearest kilogramme.

The grand total for each drug which appears in this table provisionally represents the *outside* limit for the world manufacture of the drug during the year. A certain addition will have to be made to the totals when those Governments which, in accordance with the practice recommended by the Supervisory Body, defer till after the end of the year their estimates of the amounts that will be required to bring their reserve stocks to the desired level, send in their estimates of those amounts. The totals will also be liable to modification, in the course of the year, as revised estimates of their requirements are furnished by various countries.

The following table gives a comparison between the grand total of estimates for each of the principal drugs for the years 1936 to 1940:

Table I (a).

Drugs (in anhydrous alkaloid)	Grand total of estimates				
	1936	1937	1938	1939	1940 ¹
	Kg.	Kg.	Kg.	Kg.	Kg.
1. Morphine	46 274	49 002	51 026	52 116	49 264
2. Diacetylmorphine	917	1 112	949	987	887
3. Cocaine	5 054	5 965	5 987	5 789	5 553
4. Dihydrohydroxycodineone	253	262	272	265	362
5. Dihydrocodeinone	223	204	229	225	257
6. Dihydromorphinone	103	141	146	160	150
7. Acetyldihydrocodeinone	73	83	86	80	84
8. Thebaine	626	681	960	1 035	744
9. Methyilmorphine (Codeine)	31 002	32 246	35 203	37 064	34 501
10. Ethylmorphine (Dionine)	3 688	3 586	3 406	3 588	3 491

¹ The totals for 1940 are only provisional inasmuch as supplementary estimates may yet be furnished by Governments before the end of the year.

CALCULATION OF AMOUNTS TO BRING STOCKS TO DESIRED LEVEL
(Headings IV and V of Estimates Form B (L).)

The Supervisory Body is glad to note that more and more Governments are adopting the practice which it recommended in the Statement for 1937 of leaving headings IV and V blank in the original estimates and sending a supplementary estimate after the end of the year when the stocks then in hand have been ascertained.

SUPPLEMENTARY ESTIMATES.

Since the issue in November 1939 of its Statement containing the estimates for 1940, the Supervisory Body has received and dealt with forty-one supplementary estimates for that year. By supplementary estimates, the totals of the estimates for 1940 of the five principal drugs were increased by the following quantities: morphine 5 315 kg., diacetylmorphine 116 kg., cocaine 933 kg., methylmorphine (codeine) 3 715 kg., and ethylmorphine (dionine) 624 kg.

The circumstances of the time make the system of supplementary estimates especially important, as Governments seek to adjust their original estimates to changing conditions. It is essential, if the system is to work satisfactorily, that the supplementary estimates should: (a) be accompanied by full explanations of the circumstances which make them necessary; (b) indicate precisely the particular headings (consumption, conversion, stocks) under which an alteration of the original estimate is desired.

NOTES ON THE PREPARATION OF ESTIMATES.

In previous statements, the Supervisory Body referred to a memorandum which it had prepared for the use of the officials in Government Departments concerned with the preparation of the estimates. The Supervisory Body would recall this memorandum, which appeared under the title "Notes on the Preparation of Estimates" (document C.521.M.362.1937.XI) and which may be obtained by application to the Secretary of the Supervisory Body, League of Nations, Geneva.

TABLE II

TOTALS OF THE ESTIMATES

EXPLANATORY NOTE

This table shows for each country and territory and for each of the drugs the total of its estimates for the year 1941.

"The total of the estimates" (Article 5, paragraph 2) consists of the sum of the following amounts:

- (1) The quantity of the drug estimated as necessary for use *as such*;
- (2) The quantity of the drug estimated as necessary for the purpose of conversion into other drugs (*e.g.*, morphine into diacetylmorphine, codeine, dionine);
- (3) The amounts of the drug necessary to bring the "reserve stocks" and the "Government stocks" up to the desired level or the amounts to be deducted to bring them down to such level.

These amounts are given in detail in Table III.

The drugs are referred to by their scientific names¹ and the quantities are expressed in terms of the basic anhydrous alkaloid.

The names of countries and territories for which estimates have been made by the Supervisory Body are printed in *italics*.

This table indicates:

(a) For non-manufacturing countries, the maximum amount of each drug that may be imported during the course of the year, account being taken of any quantities exported (see Article 12, paragraph (2)).

(b) For manufacturing countries, the maximum amount that may be manufactured by each country in addition to the amount required for execution of export orders received during the year (see Articles 6 and 7).

Abbreviation.

"." indicates "nil".

¹ For convenience of reference, the trade names under which certain salts of the drugs mentioned below are marketed are given here:

Dihydrohydroxycodine:	Eucodal, Hydrolaudin, Dinarcon.
Dihydrocodeinone:	Dicodide, Ydrocod.
Dihydromorphine:	Dilaudidc,
Acetyldihydrocodine:	Acedicone.

TABLE III

ANNUAL ESTIMATES OF DRUGS FOR THE YEAR 1941

EXPLANATORY NOTE

This table indicates for all countries and territories, and for each drug separately, the annual estimates of drugs for the year 1941 furnished by the Governments or framed by the Supervisory Body, in accordance with Articles 2, 4 and 5 of the Convention.

The vertical columns in the table marked I, II, III, IV and V respectively correspond to the following sections of the statistical form B (L):

I = The quantity necessary for use as such for medical and scientific needs, including in this quantity both the quantity required for the manufacture for domestic consumption of preparations for which export authorisations are not required and the quantity required for the manufacture for export of the said preparations (but the quantity of the said preparations which is to be imported into the country is to be excluded from the estimate).

II = The quantity necessary for the purpose of conversion, whether the substance resulting from this conversion is for domestic consumption or for export.

III = The amount of the reserve stocks which it is desired to maintain.

IV = $\left\{ \begin{array}{l} \text{The amount required to bring the reserve stocks up to the level it is desired to maintain} \\ \text{or} \\ \text{The amount to be deducted from the reserve stocks to bring them down to the level it is desired to maintain.} \end{array} \right.$

V = $\left\{ \begin{array}{l} \text{The amount required to bring the Government stocks up to the level it is desired to maintain} \\ \text{or} \\ \text{The amount to be deducted from the Government stocks to bring them down to the level it is desired to maintain.} \end{array} \right.$

The names of countries and territories for which estimates were framed by the Supervisory Body are printed in *italics*. As the Supervisory Body in such cases did not frame estimates as regards stocks, columns III to V are left blank throughout the table.

The absence of the name of a country or territory from the table for a particular drug means that the estimate as received or framed for that country or territory was nil.

Abbreviations.

indicates "nil".

— A figure preceded by a — sign (minus) indicates the amount by which it is estimated that the reserve stocks or Government stocks of the drug concerned will exceed at the end of the year 1940 the level of such stocks which it is desired to maintain in 1941.

[illegible]

This figure does not represent a stock which Switzerland "desires" to maintain, placed under the direct control of the Swiss authorities. This residue (the balance) cannot be used without the express authorisation of those authorities.										

1 Ce chiffre ne représente pas un stock, mais le chiffre de la production et de la consommation. Il est placé sous le contrôle direct de l'autorité compétente. Cette production ne peut être utilisée sans l'autorisation expresse de cette autorité.

2 This figure does not represent a stock, but the production and consumption. It is placed under the direct control of the competent authority. This residue (surplus) cannot be used without the express authorisation of these authorities.

3 This figure does not represent a stock, but the production and consumption. It is placed under the direct control of the competent authority. This residue (surplus) cannot be used without the express authorisation of these authorities.

4 This figure does not represent a stock, but the production and consumption. It is placed under the direct control of the competent authority. This residue (surplus) cannot be used without the express authorisation of these authorities.

5 This figure does not represent a stock, but the production and consumption. It is placed under the direct control of the competent authority. This residue (surplus) cannot be used without the express authorisation of these authorities.

6 This figure does not represent a stock, but the production and consumption. It is placed under the direct control of the competent authority. This residue (surplus) cannot be used without the express authorisation of these authorities.
